Study plan sheet for the B.Sc. in Computer Science (4-year program)

**Additional important requirements**

- **OTHER MAJOR**
  - Students must ensure that they satisfy the requirements of another B.Sc. Major

- **OTHER SCHOOL**
  - If COSC is first major, students have to ask to waive school requirements of second major. If COSC is not first major, students have to fulfill the school requirements of the second major.

- **UCore: University Common Core (36 credits)**
  - 6 credits can overlap with COSC requirements (e.g., MATH1013 and MATH1014)

- **Total number of credits (120 credits)**

**Instructions**

1. Fill out a tentative 4 year schedule on the right and check the boxes of the requirements on the left.
   - Prepare UCore courses with “UCore: Course code”, and COSC elective courses with “COSC Elec: Course code”. If you are not sure which UCore or elective course you plan to take, leave the course code unspecified.
   - For program requirement details, see the “Study Plan” section of [http://www.cse.ust.hk/bsc/](http://www.cse.ust.hk/bsc/). Note that there are restrictions on allowed electives.
   - Additional information and links to the relevant University sources can be found on that page as well.

2. Make an appointment with the COMP B.Sc. coordinator and bring a hard copy of this sheet to verify that you satisfy all requirements.

3. Ensure that you satisfy the other B.Sc. major as well. You should also plan a meeting with the UG director of that department to go over your program.

**Fall 20**

- COMP1021/1022P/1022Q
- UCore QR: MATH1013
- UCore E: LANG1002

**Spring 20**

- COMP2011
- COMP2711
- UCore: MATH2111*

**Fall 20**

- MATH2411/2421/ ELEC2600/IELM2510
- COMP2012
- COMP2611

**Spring 20**

- COMP2111
- COMP3511
- COSC Elec: LANG2030*

**Fall 20**

- LANG3030*

**Spring 20**

- COSC Elec: LANG3030*

*Suggested pathway in light gray so that it can be overwritten

*Check for potential replacements that can fulfill both majors. MATH students should take MATH2121 instead of MATH2111 and students whose first major is not in SENG should take the other school’s language courses instead of LANG2030 and LANG3030.*
