

Following is the list of available positions (full time or internship) in Machine Intelligence Center of Lenovo. If interested, please contact Jun Luo at jluo1@lenovo.com

Web Front-end Engineer

Responsibilities:

- Develop and optimize our enterprise-level web applications
- Create web sites to showcase business requirements and research results. Use front-end technologies for rapid prototype.

Requirements:

- 2+ years industry experiences on web front-end development. Master or above.
- Expertise in HTML, JavaScript, Ajax, CSS and other Web technologies. Can handle development, build, test and deployment of web applications
- Proficient in one or more mainstream MVC/MVVM framework: Vue, Angular, React, etc.
- Familiar with data visualization techniques: Echarts.js, D3.js, WebGL, etc. Know how to select techniques for different requirements
- Having skills in system design and experience in technology stack/project architecture will be an advantage
- Having deep understanding of user experience and thinking on the design of UI and UX will be an advantage

Location: Hong Kong/Shen Zhen
